

# Help the Littlest Hoglet

Key Stage 1

# Episode 1

## Hedgehog Highways

How do you get into your school?

How do you think a hedgehog might get in?

Have a look around your school's outside areas:

- Is your school surrounded by a big fence or a wall?
- Are there any gaps for hedgehogs? You could use a ruler to see if they are big enough! Remember hedgehogs need 13x13cm square holes to get in.

## Episode 2

# Steep Sided Pond

Why might a hedgehog visit your school?

Have a look around your school's outside areas:

- Have you seen any yummy bugs that a hedgehog might eat?
- Could your school create a wildlife garden? If you already have one, could you design a sign to tell hedgehogs where they can find their favourite food?
- If you are lucky enough to have a school pond, does it have a wildlife ramp?

## Episode 3 The Log Pile

Where could a hedgehog hide at your school?

Have a look around your school's outside areas:

- Do you have any bushes, flowers or overgrown areas that a hedgehog could hide in?
- Could your school create a wildlife garden? If you already have one, could you design a hiding place for The Littlest Hoglet?
- Can you design the perfect hedgehog house? Maybe you could recycle materials from around your school to actually build it?

## Episode 4 The Free Meal

Have you seen any litter around your school?

Take a look around your school's outside area:

- If you see any litter pick it up, ask your teacher about organising a litter pick!
- Make sure you put all your litter in the bin.
- Can you draw a sign to tell others not to drop litter? You could even draw The Littlest Hoglet!

## Episode 5 A Close Shave

Do you have grass at your school to play on?

Does someone cut that grass?

- Could you make a sign to warn them to watch out for The Littlest Hoglet?
- Perhaps your teacher could help you write a letter from your school asking the British Hedgehog Preservation Society to send special stickers which remind the people who cut the grass at your school to check for hedgehogs!
